Write the following using numbers, primarily, and key function marks. Indicate what each letter represents: (i) The diameter of a circle is twice its radius. (ii) The area of a rectangle is the product of its length and width. (iii) The selling price shall be equal to the sum of the cost price and profit. (iv) The total amount shall be equal to the sum of the principal and interest. v) The perimeter of a rectangle is twice the sum of its length and width. (vi) The perimeter of a square is four times its side. Solution: (i) Consider d as diameter and r as radius of the circle Therefore, we get $d = 2r$. (ii) Consider A as area, l as length and b as width of a rectangle Therefore, we get $A = l \times b$. (iii) Consider $S.P$ as selling price, $C.P$ as cost price and P as profit Therefore, we get $A = l \times b$. (iii) Consider $S.P$ as selling price, $C.P$ as cost price and P as profit Therefore, we have $S.P = C.P + P$ (iv) Consider A as the amount, P as principal and I as the interest Therefore, we get $A = P + I$ (v) Consider P as a perimeter, l as the length and b as the width of a rectangle Therefore, $P = 2(l + b)$ (vi) Consider P as perimeter and a side of a therefore square, $P = 4a$ 2. Write the following using numbers, literal and key function marks: (i) The sum of 6 and x . (ii) 3 more than a number y . (iii) One third of the number x . (iv) Half the sum of the number x and y .
